

# Postgres Benchmark

## Vertical Scaling

```
## Parsed with column specification:
## cols(
##   benchmark_description = col_character(),
##   elapsed_seconds = col_double(),
##   transactions_per_second = col_double(),
##   latency_ms = col_double(),
##   read_only = col_double(),
##   clients = col_double()
## )
##
## Attaching package: 'scales'
##
## The following object is masked from 'package:readr':
##
##   col_factor
```
